Certificates

Certified Microsoft
Azure Fundamentals

Certified Microsoft
Azure Data
Fundamentals

Experience

- Over 6.5+ years of experience in Software Development
- Experience in developing enterprise level projects
- Worked on ongoing maintenance project
- Easily grab new technologies
- Strong debugging and troubleshooting skills to analyze the root cause of the problem technically
- Strong database knowledge of SQL Server
- Analyzing user requirements and then developing systems that meet their requirements
- Technical expertise in C#, MVC and Windows forms

Technical proficiency

- | | | |
|-----------------------|-------|-----|
| ➤ .NET framework | ★★★★★ | 4.0 |
| ➤ .NET core | ★★★★ | 3.0 |
| ➤ MS sql server | ★★★★★ | 4.0 |
| ➤ JavaScript / jQuery | ★★★★ | 3.5 |
| ➤ Git | ★★★★ | 3.0 |

Additional Skills

Development Skills

- .Net Framework
- .Net Core
- C#
- WPF
- Web Services & Web API
- LINQ
- SQL Server
- HTML & CSS
- JavaScript & jQuery
- Entity Framework

Software Design Tools

- Microsoft Visual Studio
- Visual Studio Code

Development Methodologies

- Agile
- Waterfall

Project and Code

- GIT
- TFS
- SVN
- Azure DevOps
- Jira
- Trello
- Click Up
- SharePoint

Communication Medium

- Skype
- MS Team
- Slack

Other skills

- Telerik
- Postman

Education

Year	Degree	University	Result
2014-2015	Bachelor of Computer Engineering	Gujarat Technical University	CGPA (6.09)
2010-2011	HSC (GSEB)	Gyanda Girls High School	64.50%
2008-2009	SSC (GSEB)	Shakti Vidhyalaya	82.31%

Project Experience

eWallet

This application is developed in asp.net Core.

It is a transaction management system where admin can show transaction list of merchants. Transaction was done by POS machines and crypto websites. eWallet system displays list of merchants, merchants basic info, bank informations, settlement sheets for every merchants.

Merchants can also register by himself as 'Become a merchant'. Admin can approve his request.

- **Role-based access control**
- **Merchant module**
- **Users Module**
- **Wire Transfer page**
- **Merchant wise Transaction list**

Platform Frontend	.Net core MVC, jQuery
Platform Backend	Asp.NET core web Api
Database Management Server	SQL server

Progastro (Patient Management Software)

This Application developed in Asp.net MVC.

It is a patient management platform where hospitals, clinics, and doctors can keep track of their patients. This web-based platform has made patient management much easier and convenient.

Doctors can use this online tool to schedule appointments with the patient and monitor therapy. This may include personal information about the patient, reports, findings, images, and videos (made during therapy) to correctly comprehend the patient's condition and provide medication.

Essentials such as patient equipment, medicines, consumables, monitored information, origins, rooms assigned to the patient, preparations, types of exams, and so on are all stored here.

Implement Fhir/HL7 integration for getting patient details by SNS number.

Platform Frontend	.NET Framework MVC, jQuery
Platform Backend	.NET Framework
Database Management Server	SQL server

- **Role-based access control**
- **Schedules model**
- **Exams module**
- **Auxiliary tables module**
- **Security profiles module**
